## ICEFAB MESH INSTALLATION INSTRUCTIONS

IF NEEDED, TRIM LOGO USING A PAIR OF SCISSORS.

LAY LOGO IN DESIRED LOCATION AND LEAVE IN PLACE UNTIL MATERIAL REACHES ICE SURFACE TEMPERATURE. APPROX. 15 - 20 MINUTES.

MANY PRINT PROVIDERS CLAIM TO BE ABLE TO PROVIDE ICEFAB® MESH AND FABRIC ICE LOGOS. WHY RISK AN INSTALL FAILURE WHICH COULD END UP COSTING THOUSANDS OF DOLLARS TO REPAIR. OUR MESH AND FABRIC ICE LOGOS ARE PROVEN TO WORK.

**DO NOT FLOOD -  
FLOODING WILL CAUSE MATERIAL TO FLOAT**

USING A SPAY BOTTLE ( HUDDIE )  
APPLY A LIGHT MIST COAT OF WATER OVER LOGO.

USE A PAINT ROLLER TO FORCE THE WATER BETWEEN THE MESH AND TO REMOVE ANY AIR POCKETS.

LET FIRST COAT OF MIST FREEZE AND REPEAT.  
REPEAT THIS PROCESS UNTIL THE MATERIAL IS INCASED IN ICE.

**NOTE: ALLOW EACH COAT OF MIST TO FREEZE.**

**ONCE LOGO IS COMPLETELY FROZEN AND COVERED WITH A THIN COAT OF ICE, NORMAL FLOODING CAN BEGIN.**
