

Installing Etched Glass Decals

Clean the glass. Make sure it is dry and free of dirt.

Line up the decal. Tape the corners to hold in place.

We use a side hinge of tape to hold the section in place. If left handed Hinge on left side.

Run the squeegee over the masking to make sure the decal is adhered to the masking.

Flip the section away from the glass toward the hinge.

Slowly peel the paper backer away from the masking and decal toward your left.

Make sure all vinyl is stuck to the masking.

Hold the masking an inch from the glass at an angle.

Starting at the taped hinge. Work the squeegee up and down, overlapping passes. apply firm pressure.

Make several more passes before removing the masking.

Slowly pull the masking off leaving the etched decal on the glass.
